

Course Title: Hidden Secrets: Exploring Maps from the Early Modern Era

Course Code: HIS 86

Instructor: Chet Van Duzer

Course Remarks

In this course we will learn in detail about the three principal types of medieval maps—*mappaemundi* (circular world maps), the maps in the *Geography* of Claudius Ptolemy, and nautical charts. Particular focus will be placed on how early modern maps were made, not only on how the maps were commissioned, but also the sources that cartographers used, both textual and pictorial. Featured maps include a series of fifteenth-century *mappaemundi* that show what was supposed to happen to the world during the Apocalypse, and Martin Waldseemüller's famous world maps of 1507 and 1516. The segment on the decoration of maps will include discussions of sea monsters, ships, and cartouches.

The course is very visual—I will show many images of maps. It is important to see lots of maps, both the whole maps and detail images, in order to learn about them, and even heavily illustrated books or articles do not have enough images to accomplish this goal. Out of consideration for the institutions that hold the rights for the images, I cannot share the PowerPoint files, but if you want to know more about a particular map, please take note of its details in the moment and either ask me about it during the times for questions or write to me about it later.

All of the recommended readings will be freely available on the course's Canvas page, and I also include below links to them on the internet, in Open Access. At the end of the syllabus you will find suggestions for further exploration of historical maps in the form of additional readings and useful websites. I hope these prove enticing!

Grade Options and Requirements: No Grade Requested (NGR): Due to the short duration of the course, no credit can be provided and the course will not appear on official transcripts. Students may request a certificate of attendance on the last day of the course.

Course Schedule (Pacific Standard Time):

Classes will be recorded and available for the duration of the course. However, live attendance is highly recommended in order to ask questions and participate.

Week 1 – October 28, 7:00-9:00 pm Pacific Time

Lecture: In today's class I will give an introduction and the three main types of early modern maps (*mappaemundi*, nautical charts, and maps in Ptolemy's *Geography*), and will also discuss how a buyer went about ordering the creation of a medieval map.

Recommended Reading:

<https://www.degruyter.com/document/doi/10.1515/9783110686159-003/html>

Week 2 – November 4, 7:00-9:00 pm Pacific Time

Lecture: In today’s class I will discuss some very innovative fifteenth-century experiments with *mappaemundi* and the reception of Ptolemy’s *Geography*.

Recommended Reading:

Explore the maps in a fifteenth-century manuscript of Ptolemy’s *Geography* in the University of Valencia (Spain), manuscript 693. A PDF of these maps is downloadable on the course’s Canvas site; if you wish to see the whole manuscript (including the text in addition to the maps), go to this address, where the maps (26 of them) begin at p. 227 of the 252 pages on the site:

https://webliblioteca.uv.es/cgi/view.pl?source=uv_ms_0693

Week 3 – November 11, 7:00-9:00 pm Pacific Time

Lecture: In today’s class I will discuss the results of a digital humanities project to recover information from a damaged world map by Henricus Martellus that was an important source for Martin Waldseemüller in making his world map of 1507, and will also discuss the relationship between Waldseemüller’s *Carta marina* of 1516, on the one hand, and both Ptolemaic maps and nautical charts on the other.

Recommended Reading:

Chet Van Duzer, *Martin Waldseemüller’s Carta marina of 1516: Study and Transcription of the Long Legends* (New York: Springer, 2020)

<https://link.springer.com/book/10.1007/978-3-030-22703-6>

Week 4 – November 18, 7:00-9:00 pm Pacific Time

Lecture: In today’s class I will discuss the decoration of maps, in particular the images of sea monsters, ships, and cartouches, and then I will demonstrate how we can discover information hidden in early modern maps by looking at them slowly and carefully.
